Gualala Community Center Rebuilding Update

March 6, 2026

GCC Rebuilding Update:
The members of the Build Local Professional Group have been working hard this month to answer the second round of Mendocino Building Department comments. Answers and corrections will likely go out to the Mendocino Building Department early next week. We are looking forward to the building permit being issued sometime in March or April.

Monday March 9th, three metal shipping containers will be delivered to the GCC site. These containers will replace the 40-year-old 40'container that is presently on site and allow for more efficient storage of seasonal and overflow Pay 'n' Take items. When the old container is removed, the clean-up of the area can begin in preparation for grading and compaction of the building site.
